

# Toppola Camper

# The Toppola Camper converts your Saab into a mobile home

**T**he conversion of your Saab Combi Coupé into a comfortable and handy mobile home is a simple operation. It takes no more than half an hour to fit the Toppola Camper and open up a new world of excitement and adventure.

With the Toppola fitted, your Saab will be just as simple and handy to drive as it normally is. You will hardly notice that it has become a well-equipped mobile home that can sleep up to four persons. Your Saab will be just as easy to manoeuvre, reverse and park as it normally is. And you will not be restricted by the special speed limits applicable to caravans and trailers.

The road behaviour of the car will still be excellent, even at high speeds. The aerodynamic shape of the Camper contributes to good directional stability, and the fuel consumption of the car will still be reasonable.

In addition to being simple and convenient to own, the Toppola Camper is also inexpensive. The road tax on the car remains unaffected. And no renewed inspection of the car is necessary.

# You can stay in places where you couldn't even dream of staying in the past.

**T**he Toppola Camper gives you virtually unlimited freedom. You can easily travel to the most inaccessible places. Out in the country as well as in the city. In the places you love best. Unspoilt, undisturbed, private places for you and yours.

You can easily negotiate narrow forest lanes — but you can motor fast and safely on the highways with equal ease. The Toppola Camper is ideal for anybody who wishes to enjoy unspoilt nature in comfort. Wherever you can travel by car, you can also travel with the Toppola Camper.

# The Toppola camper for those who live an action-packed life.

**W**ith the Toppola Camper fitted, you can still use your Saab to tow a trailer or caravan. The Toppola Camper is ideal for those who often tow a horse-box or a boat trailer. It gives you opportunities to pursue your hobby inexpensively and conveniently.

Those who run small businesses will also appreciate the benefits of the Toppola. They can fit their Saab with the Toppola Camper, and then hitch a trailer to it to carry anything from ladders and tins of paint, to mini-excavators. When working far from home, it's convenient to spend the night in the cosy Toppola Camper after the day's work is done.

# Sturdily built and well equipped

*The Toppola Camper owes its success to many factors. The high quality, the high-class workmanship and numerous refinements are merely some of them. The Toppola Camper is very well equipped even in its standard version.*

The inspired design will become obvious as soon as you step aboard the Toppola Camper. The "top deck" at the front accommodates the generous double berth (200×170 cm) with ample space even for tall people. Two more berths can be arranged when the back seat of the car is folded down.

The kitchenette section has full standing head-room (200 cm), and the large openable windows make it light and airy. A sink with running water, a drain system with waste water container and a two-ring electronic paraffin cooker are provided at comfortable working height. An adjustable roof ventilator is provided above the kitchenette.

The Toppola Camper is designed for the Nordic climate and can also be used in the winter. The electronic paraffin cooker also serves as a heater, and the walls are well insulated. So the Toppola Camper is cosy in the winter too.

The Toppola Camper has numerous well-arranged stowage compartments for loose objects. A small wardrobe for hanging clothes on hangers is provided right next to the door.

# The Toppola Camper in brief

The Toppola Camper is designed for fitting to three-door and five-door Saab 99 and 900 Combi Coupé cars.

Length: 3.3 m (10 ft 10 in)

Maximum width: 1.9 m (6 ft 2.8 in)

Height: 2.0 m (6 ft 6.7 in)

Overall height when fitted to the car: approx. 2.5 m (8 ft 2.4 in)

Weight: approx. 150 kg (330 lb) (The total increase in weight will be only about 115 kg (250 lb) since the rear door, which weighs 35 kg (77 lb), must be removed when the Toppola is fitted.)

Material: Glass fibre reinforced polyester. Of sandwich construction with Termanto insulation used as spacer material. The outer walls are a total of 20 mm thick (winter insulation). Cabinets and shelves are made of chipboard or plywood and are covered with a tough facing material.

Mountings on the car: 6 roof mountings with reinforcements. The rear mounting is the ordinary striker plate of the rear door.

Electrical system: 12 volt, connected to the ordinary electrical system of the car.

Internal lighting: 2 bedside lamps  
3 lamps in the kitchenette section.

Water: Electric pump with automatic tap. The fresh water tank capacity is 10 litres

Drainage: System connected to a waste water container.

Electronic paraffin cooker (Wallas) with two rings. Also serves as central heating, together with the built-in fan system.

Ventilation: 1 roof ventilator

1 steplessly openable roof hatch with mosquito netting

2 small openable windows in the upper bunk section

2 large openable windows in the kitchenette section

Fitting time: 15—30 minutes.

Optional accessories: Fire extinguisher, steps, kitchen ventilation fan, air conditioner, heavy-duty air springs, mounting stand.

Financing: Eight-year hire-purchase with 20 % deposit to approved buyers.

For other information and demonstration of the Toppola Camper, please consult your local Saab dealer.
